NAME OF TAXABLE PARTY.

#### Vorwort.

Die nachstehenden Aufzeichnungen, das Resultat der seit 25 Jahren gesammelten Notizen aus allen mir zugänglichen conchyliologischen Schriften, sind nur zur Selbstbenutzung gemacht und haben mir stets ganz erspriessliche Dienste geleistet, wenn auch der Kürze halber die Angabe der Quelle unterblieb, welchem Mangel später mit dem besten Willen nicht abzuhelfen war.

Seit Jahren redeten mir meine Freunde zu, diese Notizen zu Nutz und Frommen aller Sammler und Freunde der Conchyliologie trotz dieses Mangels zu veröffentlichen.

Indem es nun geschieht, muss ich voraus schicken, dass der besseren Uebersicht halber die Eintheilung von fünf Columnen gewählt ist.

Die erste Columne enthält den Namen.

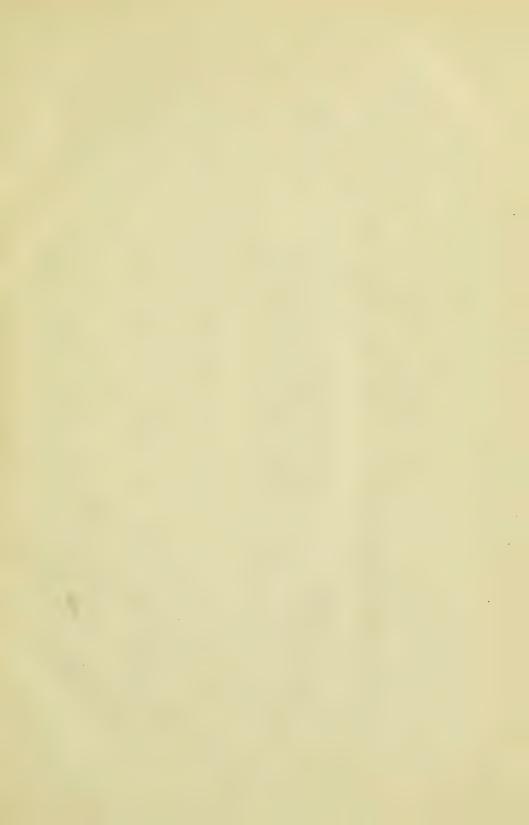

Die zweite Columne den Autor des Namens.

Die dritte Columne enthält die Bestimmung des Namens, ob Genus, ob Familie, ob Section, u. s. w.

Die vierte Columne das Genus resp. die Familie u. s. w. zu welcher der betreffende Name gehört.

Und endlich die fünfte Columne bezeichnet durch ein "f" die nur für fossile Conchylien gebräuchlichen Namen; durch ein "n" wird alles nur nackt vorkommende bezeichnet; durch "Cirr." die Cirripeden u. s. w. Fehlt die Bezeichnung in dieser Columne ganz, so ist der Name nur für lebende, Schaalen tragende Mollusken gebräuchlich und anzuwenden. Bei fehlerhaften Schreibarten und Synonymen wird in der vierten Columne auf die geltende und richtige Benennung hingewiesen.

Der Verfasser.
